Harrington Capital plc -- Root Cause Analysis Template

Copy and rename to: INC-YYYYMMDD-NNN-RCA.md

Incident Details

Field	Value
Incident ID	INC-YYYYMMDD-NNN
Priority	P1 / P2
Title	Brief description
Detection time	YYYY-MM-DD HH:MM
Resolution time	YYYY-MM-DD HH:MM
Total duration	X hours Y minutes
Systems affected	HC-DC01, HC-APP01 etc
Users affected	Estimated count
Author	Your name
RCA submitted	YYYY-MM-DD
Change request ref	CHG-YYYYMMDD-NNN

Executive Summary

One paragraph. Describe what happened, the business impact, the root cause, and the primary remediation action. Written for non-technical readers.

Timeline of Events

Time	Event
HH:MM	First symptom observed
HH:MM	Incident declared / GLPI ticket opened
HH:MM	Initial triage complete
HH:MM	Root cause identified
HH:MM	Fix applied
HH:MM	Service restored
HH:MM	Incident closed

Root Cause

Primary root cause

Describe the specific technical cause. Be precise -- not "disk filled up" but "trading platform log rotation was disabled, causing /var/log to fill to 100% on HC-APP01 within 72 hours of a log verbosity increase applied on YYYY-MM-DD."

Contributing factors

List any factors that made the incident worse or harder to detect: - Factor 1 - Factor 2

Why it was not caught earlier

Describe the monitoring gap, process gap, or configuration gap that allowed the condition to develop undetected.

Impact Assessment

Category	Detail
Service disruption	X minutes of complete outage
Users affected	N users could not access [system]
Financial exposure	Estimated £X (if applicable)
Data integrity	Confirmed not affected / affected (explain)
Regulatory trigger	Yes / No -- if yes, state DORA article

Remediation Actions

Immediate (applied during incident)

1. Action taken
2. Action taken

Short-term (within 7 days)

1. Action | Owner | Due date
2. Action | Owner | Due date

Long-term (within 30 days)

1. Action | Owner | Due date
2. Action | Owner | Due date

Lessons Learned

What went well:

- Item 1
- Item 2

What could be improved:

- Item 1
- Item 2
